Viruses

Bonzi buddy [not much of a virus a purple bear will appear on your computer and cant be disabled, it was supposed to help but will get annoying driving you to buy a new computer]

Youtube WATC hack [will turn up with a scary video if you mess up a link to a video by not adding the H to watch]

You.are.an.idiot.org [will play a video with a screen harmlessly saying you are an idiot but clicking off this video will fill your computer with the video,forcing you to buy a new computer]

Scam ads [I have been seeing a lot of mrbeast scams saying they will give you one grand if you visit their page but this probably isn't a virus just a scam for views and money]

REMINDER: Make sure your child is playing the appropriate age rated games.
